

Acro & Flexibility for Dancers

Acro and Flexibility incorporates acrobatic, gymnastic movements into dance routines and is one of the more challenging dance styles to teach and to learn. It focuses on concentration, balance, flexibility and control. This style teaches students the importance of being spatially aware, persistent, and confident. It often includes working with a partner and using balance and agility skills to work together and achieve a common goal. Students will experience the joy of accomplishing hard earned personal goals with the techniques learned in class.
